283 PU_2016_391_D
Read the following passage and answer the question given below:-

Workplace bullying is a separate issue from sexual or racial harassment. It constitutes unwanted, offensive, humiliating, undermining behaviour towards an individual or groups of employees. Such persistently malicious attacks on personal or professional performance are typically unpredictable, irrational and often unfair. It can cause such chronic stress and anxiety that people gradually lose belief in themselves, suffering physical ill health and mental distress as a result. Although people in workplaces have been dealing with bullying for many years, the concept was named a little more than a decade ago. The last few years have seen considerable professional and academic work on the topic around the world. Across the globe a pattern is emerging of how interest in bullying at work grows. Typically it starts with press reports on some rather dreadful incident of people being treated badly at work. This is followed by a study which exposes the extent to which ordinary people experience negative events in their working lives. The subsequent publicity generates further interest, and often replica or improved studies are undertaken which establish with more certainty that there is 'something' going on (or not) in our working environments. In Britain the British Broadcasting Corporation (BBC) can take credit for being a lynchpin in our emergent awareness. The BBC ran a radio documentary programme in 1990. In this programme Andrea Adams (a freelance journalist) introduced the topic and played taped interviews of people talking about their negative experiences at work. Charlotte Rayner from Staffordshire University, was brought to conduct a survey which would provide more formal evidence of the problem. Unlike everyday conflicts at work, bullying is a long-lasting one, where one person is systematically harassed by one or more colleagues or superiors. It also creates an unhealthy working atmosphere usually by intimidating the rest. The basic purpose of bullying is to hide inadequacy. On a social group level, bullying may be explained in terms of 'scape goating'. For instance, being too honest or unwilling to compromise may contribute to attaining the role of a scapegoat. In cases of 'predatory bullying' the victim has done nothing provocative that may reasonably justify the behaviour of the bully. Sheila Freeman and Helene Richards, have the following advice for the victims: "Do not think that the bully's behaviour is going to improve because it will not. Either get out and cut your losses or, if you are strong enough, fight it".

Q) In Britain the British Broadcasting Corporation (BBC) can take credit for being a lynchpin in our emergent awareness. What does lynchpin mean in the given context?

○ a bully

○ a pin placed transversely through an axle to keep a wheel in position

○ a person who considers himself as inevitable

○ a person or thing regarded as an essential or coordinating element

267 PU_2016_391_D

There are more _____ than last year.

Select the correct synonyms of the following question.

Admonish

○ Distortion

○ Decanter

○ Reprove

○ Carouse

291 PU_2016_391_D
Read the following passage and answer the question given below:-

The average life span of humanity throughout all history was twenty seven years. In the nineteenth century, however, science and improved technology trebled life expectancy. As technological capabilities improved and life expectancy increased, the number of babies per family went down, demonstrating the fact that nature keeps on balancing the population figure. After major wars, when large numbers of young and healthy men are killed, baby-making increases. The birth rate continues to rise for five years or so after the war ends until the score is rectified. All this happens without conscious cooperation or even the knowledge of the human beings. When the probabilities of human survival are poor, nature makes many babies. When the chances of man's survival improve, nature reduces number of new babies.

Q) With the development of science and technology in the 19th century:-

○ More people were expected to live longer

○ People expected more agricultural production

○ People expected to produce more babies

○ People expected more comforts in life

275 PU_2016_391_D
Select the correct synonyms of the following question.

Credence

○ Split

○ Ponder

○ Belief

○ Outwit

299 PU_2016_391_D

On a social group level, bullying may be explained in terms of 'scape goating'. For instance, being too honest or unwilling to compromise may contribute to attaining the role of a scapegoat. In cases of 'predatory bullying' the victim has done nothing provocative that may reasonably justify the behaviour of the bully. Sheila Freeman and Helene Richards, have the following advice for the victims: "Do not think that the bully's behaviour is going to improve because it will not. Either get out and cut your losses or, if you are strong enough, fight it".

Q) What is the basic purpose of bullying, as per the passage?

To hide inadequacy

To hide conflicts

To prevent workplace violence

To prevent intimidating the rest

Separation

290 PU_2016_391_D
Read the following passage and answer the question given below:-

The average life span of humanity throughout all history was twenty seven years. In the nineteenth century, however, science and improved technology trebled life expectancy. As technological capabilities improved and life expectancy increased, the number of babies per family went down, demonstrating the fact that nature keeps on balancing the population figure. After major wars, when large numbers of young and healthy men are killed, baby-making increases. The birth rate continues to rise for five years or so after the war ends until the score is rectified. All this happens without conscious cooperation or even the knowledge of the human beings. When the probabilities of human survival are poor, nature makes many babies. When the chances of man's survival improve, nature reduces number of new babies.

Q)The author says that throughout history -

○ Every man lived twenty seven years or so

○ Some men lived far less than twenty seven years

○ Every man died on attaining twenty seven years

○ The average life of human race was twenty seven years

294 PU_2016_391_D
Read the following passage and answer the question given below:-

The average life span of humanity throughout all history was twenty seven years. In the nineteenth century, however, science and improved technology trebled life expectancy. As technological capabilities improved and life expectancy increased, the number of babies per family went down, demonstrating the fact that nature keeps on balancing the population figure. After major wars, when large numbers of young and healthy men are killed, baby-making increases. The birth rate continues to rise for five years or so after the war ends until the score is rectified. All this happens without conscious cooperation or even the knowledge of the human beings. When the probabilities of human survival are poor, nature makes many babies. When the chances of man's survival improve, nature reduces number of new babies.

Q) The title that best expresses the ideas of the passage is:-

○ Life and Babies

○ Natural Checks on Population

○ Population and War

○ Population, War and Nature

295 PU_2016_391_D
Read the following passage and answer the question given below:-

The average life span of humanity throughout all history was twenty seven years. In the nineteenth century, however, science and improved technology trebled life expectancy. As technological capabilities improved and life expectancy increased, the number of babies per family went down, demonstrating the fact that nature keeps on balancing the population figure. After major wars, when large numbers of young and healthy men are killed, baby-making increases. The birth rate continues to rise for five years or so after the war ends until the score is rectified. All this happens without conscious cooperation or even the knowledge of the human beings. When the probabilities of human survival are poor, nature makes many

babies. When the chances of man's survival improve, nature reduces number of new babies.

Q) All this happens without conscious cooperation or even the knowledge of the human beings - what is the author referring to as "this"?

○ Conscious increase of birth rate

○ Conscious increase of death rate

○ Increase of birth rate

○ Decrease of birth rate

186 PU_2015_391
Read the following passage and answer the question.

True, it is the function of the army to maintain law and order in abnormal times. But in normal times there is another force that compels citizens to obey the laws and to act with due regard to the rights of others. The force also protects the lives and the properties of law abiding men. Laws are made to secure the personal safety of its subjects and to prevent murder and crimes of violence. They are made to secure the property of the citizens against theft and damage to protect the rights of communities and castes to carry out their customs and ceremonies, so long as they do not conflict with the rights of others. Now the good citizen, of his own free will obey these laws and he takes care that everything he does is done with due regard to the rights and well-being of others. But the bad citizen is only restrained from breaking these laws by fear of the consequence of his actions. And the necessary steps to compel the bad citizen to act as a good citizen are taken by this force. The supreme control of law and order in a State is in the hands of a Minister who is responsible to the State Assembly and acts through the Inspector General of

Police.

Which of the following is not implied in the passage?

○ The forces of law help to transform irresponsible citizens into responsible ones.

○ Law protects those who respect it.

○ A criminal is deterred from committing crimes only for fear of the law.

○ Law ensures people's religious and social rights absolutely and unconditionally.

188 PU_2015_391
Read the following passage and answer the question.

True, it is the function of the army to maintain law and order in abnormal times. But in normal times there is another force that compels citizens to obey the laws and to act with due regard to the rights of others. The force also protects the lives and the properties of law abiding men. Laws are made to secure the personal safety of its subjects and to prevent murder and crimes of violence. They are made to secure the property of the citizens against theft and damage to protect the rights of communities and castes to carry out their customs and ceremonies, so long as they do not conflict with the rights of others. Now the good citizen, of his own free will obey these laws and he takes care that everything he does is done with due regard to the rights and well-being of others. But the bad citizen is only restrained from breaking these laws by fear of the consequence of his actions. And the necessary steps to compel the bad citizen to act as a good citizen are taken by this force. The supreme control of law and order in a State is in the hands of a Minister who is responsible to the State Assembly and acts through the Inspector General of Police.

Which of the following reflects the main thrust of the passage?

○ It discusses the roles of the army and the police in different circumstances.

○ It highlights role of the police as superior to that of the army.

○ It points to the responsibility of the Minister and the Inspector General of Police.

○ It deals with the importance of the army in maintaining law and order.

185 PU_2015_391
Read the following passage and answer the question.

True, it is the function of the army to maintain law and order in abnormal times. But in normal times there is another force that compels citizens to obey the laws and to act with due regard to the rights of others. The force also protects the lives and the properties of law abiding men. Laws are made to secure the personal safety of its subjects and to prevent murder and crimes of violence. They are made to secure the property of the citizens against theft and damage to protect the rights of communities and castes to carry out their customs and ceremonies, so long as they do not conflict with the rights of others. Now the good citizen, of his own free will obey these laws and he takes care that everything he does is done with due regard to the rights and well-being of others. But the bad citizen is only restrained from breaking these laws by fear of the consequence of his actions. And the necessary steps to compel the bad citizen to act as a good citizen are taken by this force. The supreme control of law and order in a State is in the hands of a Minister who is responsible to the State Assembly and acts through the Inspector General of Police.

A suitable title for the passage would be:-

○ the fear of the law and citizen's security.

○ the functions of the police.

○ the function of the army.

○ laws and the people's rights.

184 PU_2015_391
Read the following passage and answer the question.

True, it is the function of the army to maintain law and order in abnormal times. But in normal times there is another force that compels citizens to obey the laws and to act with due regard to the rights of others. The force also protects the lives and the properties of law abiding men. Laws are made to secure the personal safety of its subjects and to prevent murder and crimes of violence. Read the below passage and answer the question.

Most people can remember a phone number for up to thirty seconds. When this short amount of time elapses, however, the numbers are erased from the memory. How did the information get there in the first place? Information that makes its way to the short term memory (STM) does so via the sensory storage area. The brain has a filter which only allows stimuli that is of immediate interest to pass on to the STM, also known as the working memory.

There is much debate about the capacity and duration of the short term memory. The most accepted theory comes from George A. Miller, a cognitive psychologist who suggested that humans can remember approximately seven chunks of information. A chunk is defined as a meaningful unit of information, such as a word or name rather than just a letter or number. Modern theorists suggest that one can increase the capacity of the short term memory by chunking, or classifying similar information together. By organizing information, one can optimize the STM, and improve the chances of a memory being passed on to long term storage.

When making a conscious effort to memorize something, such as information for an exam, many people engage in "rote rehearsal". By repeating something over and over again, one is able to keep a memory alive. Unfortunately, this type of memory maintenance only succeeds if there are no interruptions. As soon as a person stops rehearsing the information, it has the tendency to disappear. When a pen and paper are not handy, people often attempt to remember a phone number by repeating it aloud. If the doorbell rings or the dog barks to come in before a person has the opportunity to make a phone call, he will likely forget the number instantly.Therefore, rote rehearsal is not an efficient way to pass information from the short term to long term memory. A better way is to practice "elaborate rehearsal". This involves assigning semantic meaning to a piece of information so that it can be filed along with other pre-existing

long term memories.

Encoding information semantically also makes it more retrievable. Retrieving information can be done by recognition or recall. Humans can easily recall memories that are stored in the long term memory and used often; however, if a memory seems to be forgotten, it may eventually be retrieved by prompting. The more cues a person is given (such as pictures), the more likely a memory can be retrieved. This is why multiple choice tests are often used for subjects that require a lot of memorization.

Why does the author mention a dog's bark?

○ To prove that dogs have better memories than humans

○ To give an example of a type of memory

○ To compare another sound that is loud like a doorbell

○ To provide a type of interruption

Read the below passage and answer the question.

Most people can remember a phone number for up to thirty seconds. When this short amount of time elapses, however, the numbers are erased from the memory. How did the information get there in the first place? Information that makes its way to the short term memory (STM) does so via the sensory storage area. The brain has a filter which only allows stimuli that is of immediate interest to pass on to the STM, also known as the working memory.

There is much debate about the capacity and duration of the short term memory. The most accepted theory comes from George A. Miller, a cognitive psychologist who suggested that humans can remember approximately seven chunks of information. A chunk is defined as a meaningful unit of information, such as a word or name rather than just a letter or number. Modern theorists suggest that one can increase the capacity of the short term memory by chunking, or classifying similar information together. By organizing information, one can optimize the STM, and improve the chances of a memory being passed on to long term storage.

When making a conscious effort to memorize something, such as information for an exam, many people engage in "rote rehearsal". By repeating something over and over again, one is able to keep a memory alive. Unfortunately, this type of memory maintenance only succeeds if there are no interruptions. As soon as a person stops rehearsing the information, it has the tendency to disappear. When a pen and paper are not handy, people often attempt to remember a phone number by repeating it aloud. If the doorbell rings or the dog barks to come in before a person has the opportunity to make a phone call, he will likely forget the number instantly.Therefore, rote rehearsal is not an efficient way to pass information from the short term to long term memory. A better way is to practice "elaborate rehearsal". This involves assigning semantic meaning to a piece of information so that it can be filed along with other pre-existing long term memories.

Encoding information semantically also makes it more retrievable. Retrieving information can be done by recognition or recall. Humans can easily recall memories that are stored in the long term memory and used often; however, if a memory seems to be forgotten, it may eventually be retrieved by prompting. The more cues a person is given (such as pictures), the more likely a memory can be retrieved. This is why multiple choice tests are often used for subjects that require a lot of memorization.

The word elapses in paragraph 1 is closest in meaning to:-

○ passes

○ adds up

○ appears

○ continues

296 PU_2015_391
Read the below passage and answer the question.

Most people can remember a phone number for up to thirty seconds. When this short amount of time elapses, however, the numbers are erased from the memory. How did the information get there in the first place? Information that makes its way to the short term memory (STM) does so via the sensory storage area. The brain has a filter which only allows stimuli that is of immediate interest to pass on to the STM, also known as the working memory.

There is much debate about the capacity and duration of the short term memory. The most accepted theory comes from George A. Miller, a cognitive psychologist who suggested that humans can remember approximately seven chunks of information. A chunk is defined as a meaningful unit of information, such as a word or name rather than just a letter or number. Modern theorists suggest that one can increase the capacity of the short term memory by chunking, or classifying similar information together. By organizing information, one can optimize the STM, and improve the chances of a memory being passed on to long term storage.

When making a conscious effort to memorize something, such as information for an exam, many people engage in "rote rehearsal". By repeating something over and over again, one is able to keep a memory alive. Unfortunately, this type of memory maintenance only succeeds if there are no interruptions. As soon as a person stops rehearsing the information, it has the tendency to disappear. When a pen and paper are not handy, people often attempt to remember a phone number by repeating it aloud. If the doorbell rings or the dog barks to come in before a person has the opportunity to make a phone call, he will likely forget the number instantly.Therefore, rote rehearsal is not an efficient way to pass information from the short term to long term memory. A better way is to practice "elaborate rehearsal". This involves assigning semantic meaning to a piece of information so that it can be filed along with other pre-existing long term memories.

Encoding information semantically also makes it more retrievable. Retrieving information can be done by recognition or recall. Humans can easily recall memories that are stored in the long term memory and used often; however, if a memory seems to be forgotten, it may eventually be retrieved by prompting. The more cues a person is given (such as pictures), the more likely a memory can be retrieved. This is why multiple choice tests are often used for subjects that require a lot of memorization.

According to the passage, how do memories get transferred to the STM?

○ They get chunked when they enter the brain.

○ They enter via the nervous system.

○ They revert from the long term memory.

○ They are filtered from the sensory storage area.

298 PU_2015_391
Read the below passage and answer the question.

Most people can remember a phone number for up to thirty seconds. When this short amount of time

elapses, however, the numbers are erased from the memory. How did the information get there in the first place? Information that makes its way to the short term memory (STM) does so via the sensory storage area. The brain has a filter which only allows stimuli that is of immediate interest to pass on to the STM, also known as the working memory.

There is much debate about the capacity and duration of the short term memory. The most accepted theory comes from George A. Miller, a cognitive psychologist who suggested that humans can remember approximately seven chunks of information. A chunk is defined as a meaningful unit of information, such as a word or name rather than just a letter or number. Modern theorists suggest that one can increase the capacity of the short term memory by chunking, or classifying similar information together. By organizing information, one can optimize the STM, and improve the chances of a memory being passed on to long term storage.

When making a conscious effort to memorize something, such as information for an exam, many people engage in "rote rehearsal". By repeating something over and over again, one is able to keep a memory alive. Unfortunately, this type of memory maintenance only succeeds if there are no interruptions. As soon as a person stops rehearsing the information, it has the tendency to disappear. When a pen and paper are not handy, people often attempt to remember a phone number by repeating it aloud. If the doorbell rings or the dog barks to come in before a person has the opportunity to make a phone call, he will likely forget the number instantly.Therefore, rote rehearsal is not an efficient way to pass information from the short term to long term memory. A better way is to practice "elaborate rehearsal". This involves assigning semantic meaning to a piece of information so that it can be filed along with other pre-existing long term memories.

Encoding information semantically also makes it more retrievable. Retrieving information can be done by recognition or recall. Humans can easily recall memories that are stored in the long term memory and used often; however, if a memory seems to be forgotten, it may eventually be retrieved by prompting. The more cues a person is given (such as pictures), the more likely a memory can be retrieved. This is why multiple choice tests are often used for subjects that require a lot of memorization.

All of the following are mentioned as places in which memories are stored EXCEPT the:-

- ⬜ maintenance area
- ⬜ sensory storage area
- ⬜ long term memory
- ⬜ STM

Sr No.	MSW Social Work
1	Find the next term in the series: BMO, EOQ, HQS, ?
Alt1	KSU
Alt2	LMN
Alt3	SOV
Alt4	SOW

2	Choose word from the given options which bears the same relationship to the third word, as the first two bears: Misogamy: Marriage:: Misogyny:?
Alt1	Children
Alt2	Husband
Alt3	Relations
Alt4	Women

3	Select the lettered pair that has the same relationship as the original pair of words: Indolence : Beaver
Alt1	Elegance: Peacock
Alt2	Ferocity: Lamb
Alt3	Passivity: Cow
Alt4	Joviality: Hyena

4	Select the lettered pair that has the same relationship as the original pair of words: Man : Humanity
Alt1	Frame: Picture
Alt2	Scholar: Books
Alt3	Flowers: Fragrance
Alt4	Drop: Ocean

5	Choose the set that has the same relationship as in the original: Horse : Foal : Mare
Alt1	Sheep: lamb: Goat
Alt2	Lion: Cub: Den
Alt3	Man: Child: Woman
Alt4	Cat: Kitten: Puppy

6	Spot the defective segment from the following:
Alt1	I didn't expect
Alt2	this kind of treatment
Alt3	from your hands
Alt4	this morning

7	Many rural children go to school ---------.
Alt1	by foot
Alt2	by walk
Alt3	on foot
Alt4	on their feet

8	------- is facing the threat of extinction.
Alt1	Tigers
Alt2	Tiger
Alt3	The tiger
Alt4	A tiger

9	Choose the option closest in meaning to the given word: TERSE
Alt1	concise
Alt2	curt
Alt3	rude
Alt4	poetic

10	Choose the antonymous option you consider the best: RETICENT
Alt1	communicative
Alt2	clamorous
Alt3	reserved
Alt4	dormant

11	In each of the following questions some statements are followed by two conclusions (i) and (ii). Read the statements carefully and then decide which of the conclsions follow beyond a reasonable doubt. Mark your answer as Statement: I am a Kashmiri Pandit and feel proud that Indira Gandhi belonged to the same community Conclusions: (i) Indira Gandhi is proud of being a Kashmiri Pandit (ii) All Kashmiri Pandits feel proud of Indira Gandhi
Alt1	If only conclusion (i) follows
Alt2	If only conclusion (ii) follows
Alt3	If neither conclusion (i) nor (ii) follows
Alt4	If both the conclusions follow

12	What value should come in place of question mark (?) in the following number series? 48, ?, 94, 123, 156, 193
Alt1	74
Alt2	65
Alt3	69
Alt4	77

13	If in a certain language CARROM is coded as BZQQNL, which word will be coded as HOUSE ?
Alt1	IPVTF
Alt2	GNTRD
Alt3	INVRF

Alt4	GPTID

14	Teeth : Chew in the same way as
Alt1	Mind : Think
Alt2	Food : Taste
Alt3	Sweater : Heat
Alt4	Eyes : Flicker

15	The following information is given: Eight persons P, Q, R, S, T, U, V and W are sitting around a rectangular table in such a way that two persons sit on each of the four sides of the table facing the centre. Persons sitting on opposite sides are exactly opposite to each other. S faces North and sits exactly opposite W. T is on the immediate left to W. P and V sit on the same side. V is exactly opposite Q, who is on the immediate right of R. U is next to the left of S. Who is sitting opposite to P ?
Alt1	V
Alt2	S
Alt3	T
Alt4	R

16	There are 4 prime numbers written in ascending order. The product of the first three is 385, and that of the last three is 1001, Find the first number
Alt1	5
Alt2	11
Alt3	29
Alt4	19

17	Mean of the first 10 even numbers is
Alt1	12
Alt2	11
Alt3	14
Alt4	9

18	If you were to spell out the numbers, how far would you have to go before encountering the letter 'A'?
Alt1	91
Alt2	21
Alt3	51
Alt4	101

19	A man starts from his office and goes 5 Kms east, Then he turn to the left and again walks for 3 Kms, he turns left and walks 5 kms. At what distance is he from the starting point?
Alt1	3
Alt2	4
Alt3	6
Alt4	7

20	The first person is 100cm tall. Each subsequent person is 20% taller than the previous person. What is the Median height of 5 persons.
Alt1	173
Alt2	120
Alt3	144
Alt4	207

21	The founder of social work education in India?
Alt1	Friedlander
Alt2	Jawaharlal Nehru
Alt3	Rajendra Prasad
Alt4	Clifford Manshardt

22	Which one of the following is a principle of social work?
Alt1	Community Services
Alt2	Self determination
Alt3	Social planning
Alt4	Social development

23	International Social Work Day is celebrated in the month of
Alt1	January
Alt2	February
Alt3	March
Alt4	April

Alt1	Zakir Hussain
Alt2	S. RadhaKrishnan
Alt3	R. Venkata Raman
Alt4	V.V. Giri

52	Which of the following gives the output of a hard copy ?
Alt1	Speaker
Alt2	Flash Drive
Alt3	Printer
Alt4	Monitor

53	Sum of the first 100 Natural numbers _____
Alt1	5000
Alt2	5050
Alt3	505
Alt4	1050

54	Rani had 9 bags of apples. Each bag consists of 13 apples. A friend gave her 13 more apples. How many apples does she have now ?
Alt1	184
Alt2	194
Alt3	130
Alt4	140

55	Find out the mean for 7, 0, 8, 3 ,0, 8, 12, 4 and 3
Alt1	5
Alt2	6
Alt3	8
Alt4	4

56	The University Grants Commission appointed the first Review Committee for Social Work Education in India in the year
Alt1	1960
Alt2	1962
Alt3	1964
Alt4	1968

57	Who propounded the Theory of Suicide ?
Alt1	D.D. Fisher
Alt2	Emile Durkheim
Alt3	Karl Marx

Alt4	G. Einstein

58	Amnesia' refers to
Alt1	Loss of ability
Alt2	Loss of memory
Alt3	Loss of emotional control
Alt4	Loss of analytical thinking

59	Who introduced three basic models of Community Organization?
Alt1	Jack Rothman
Alt2	W. Young
Alt3	M. A. White
Alt4	C. Turner

60	Arrange the following human needs as developed by Maslow in order 1. Physiological needs 2. Safety needs 3. Social needs 4. Self-esteem needs
Alt1	1,4,3,2
Alt2	1,3,4,2
Alt3	1,3,2,4
Alt4	1,2,3,4

61	Arrange the following stages of group in a sequential order 1. Performing 2. Storming 3. Forming 4. Norming
Alt1	3,2,4,1
Alt2	4,2,3,1
Alt3	3,4,1,2
Alt4	2,3,1,4

62	Place the following research activity in order of hierarchy. 1. Data Classification 2. Data Collection 3. Tabulation 4. Coding
Alt1	2,4,1,3
Alt2	1,3,4,2
Alt3	4,2,1,3
Alt4	1,2,3,4

63	Arya Samaj was founded by
Alt1	Raja Ram Mohan Roy
Alt2	Swami Vivekananda
Alt3	Dayanand Saraswati
Alt4	Annie Besant

64	Who is the last Governor General of India?
Alt1	Mountbatten
Alt2	Rajagopalachari
Alt3	Curzon
Alt4	Rajendra Prasad

65	Which one of these is not a Search Engine?
Alt1	Google
Alt2	Yahoo
Alt3	Bing
Alt4	Avast

66	What does PDF stands for
Alt1	Portable Document File
Alt2	Portable Document Format
Alt3	Portable Document Font
Alt4	Public Document File

67	Ozone depletion is caused by
Alt1	Nitrous oxide
Alt2	Carbon dioxide
Alt3	Chlorofluorocarbons
Alt4	Methane

68	Greenhouse gases which is present in very high quantity is
Alt1	Propane
Alt2	Ethane
Alt3	Carbon dioxide
Alt4	Methane

69	The following countries have a border with India to the North West?
Alt1	Bhutan
Alt2	Iran
Alt3	Afghanistan
Alt4	Bangladesh

70	Who among the following is not a Bharat Ratna Awadee?
Alt1	Rajiv Gandhi
Alt2	Kamaraj
Alt3	Lata Mangeshkar
Alt4	Asha Bhosle

71	On whose Birth Anniversary Swachh Bharat Abhiyan was launched in India?
Alt1	Vallabhbhai Patel
Alt2	Mahatma Gandhi
Alt3	Atal Bihari Vajpayee
Alt4	Ambedkar
